Pieranna Garavaso and Nicola Vassallo investigate Gottlob Frege's notion of thinking *das Denken* to provide a new analysis of a largely unexplored area of the philosopher's work confronting Frege's deeply seated and widely emphasized anti-psychologism. Frege on Thinking and Its Epistemic Significance claims that the objective human science that Frege proposed can only be possible through a nuanced notion of thinking as neither merely psychological nor merely logical. Focusing on what Frege says about thinking in many passages from his works, Garavaso and Vassallo argue that Frege was engaged with issues that are still

alive in contemporary debates such as the definition of knowledge and the necessary role of language in conceptual thinking and in the expression of thoughts frege on thinking and its epistemic significance is essential not only for those interested in a new and original reading of frege s philosophy but also for anyone engaged in epistemology logic psychology philosophy of language and the history of analytic philosophy

what do we humans claim when we define ourselves as thinking beings what do we mean when we claim to know something what can we know at all how autonomous is our thinking when can we claim something to be true how certain and truthful are the insights provided by the natural sciences to what are we committed for all our knowing such and other questions are being addressed from the perspective and the tradition of existential thought the trilogy what obligates us raises the question about the ethical foundation of the human condition this second part has human thinking as its specific scope like no others existential philosophers have questioned the power and impotence of science as they have addressed the many beliefs and certainties that humans appropriated for themselves central insights from the works of kierkegaard heidegger wittgenstein and gadamer inspire the book s quest for the particular nature of being human and our claims to be able to know anything at all beyond its specific questions the work also lends itself to being read as an introduction into existential philosophy or into philosophy as such

an invaluable resource to anyone who wants to think better gretchen rubin award winning yale professor woo kyoung ahn delivers a must read a smart and compellingly readable guide to cutting edge research into how people think paul bloom a fun exploration dax shepard psychologist woo kyoung ahn devised a course at yale called thinking to help students examine the biases that cause so many problems in their daily lives it quickly became one of the university s most popular courses now for the first time ahn presents key insights from her years of teaching and research in a book for everyone she shows how thinking problems stand behind a wide range of challenges from common self inflicted daily aggravations to our most pressing societal issues and inequities throughout ahn draws on decades of research from other cognitive psychologists as well as from her own groundbreaking studies and she presents it all in a compellingly readable style that uses fun examples from pop culture anecdotes from her own life and illuminating stories from history and the headlines thinking 101 is a book that goes far beyond other books on thinking showing how we can improve not just our own daily lives through better awareness of our biases but also the lives of everyone around us it is quite simply required reading for everyone who wants to think and live better

in thinking 101 you can transform your life with clear actionable steps to overcome challenges and biases in your thinking from renowned yale psychologist woo kyoung ahn we all make thinking errors more often than we wish we misjudge mispredict and misunderstand things happening around us some of these reasoning errors are now well known such as confirmation bias planning fallacy or loss aversion and yet merely learning that these errors happen and what their names are rarely help us avoid them thinking 101 offers specific ways to correct them by offering down to earth answers as to how or why these errors

occur woo kyoung ahn an acclaimed professor of psychology at yale teaches these strategies to her students in what quickly became one of the college's most popular courses now for the first time she is presenting key insights from her years of teaching and research in a book for everyone throughout ahn draws on decades of research from other cognitive psychologists as well as from her own ground breaking studies thinking 101 is a book that goes far beyond other books on thinking showing how through better awareness of our biases we can improve not just our own daily lives but the lives of everyone around us it is quite simply required reading
